

CONTACT INFORMATION	 Atlanta, GA  ntatarinov3@gatech.edu  Website  LinkedIn  Google Scholar  GitHub
RESEARCH INTERESTS	Structured knowledge, retrieval-augmented language models, knowledge graphs, NLP for finance, long-context evaluation, and machine learning systems.
EDUCATION	Georgia Institute of TechnologyAtlanta, USA Ph.D. in Machine LearningAug 2023 - Present • Advisor: Dr. Sudheer Chava, Alton M. Costley Chair Professor of Finance. • Transferred from <i>M.S. in Quantitative and Computational Finance</i> after one year. • CGPA: 3.72/4.00 • Key coursework: Large Language Models (Special Topics), Machine Learning for Graphs (ST), Deep Learning for Text (ST), Natural Language, Mathematical Foundations of Machine Learning. NRU HSEMoscow, Russia Bachelor in Software Engineering (minor in Applied Economics)Sep 2019 - Jul 2023 • CGPA: 8.67/10.00 • Key coursework: Data Analysis in Finance, Mathematical Methods for Data Analysis, Analysis of Markets and Competitiveness, Quantitative Methods in Economics, Computer Vision Technologies, Distributed Databases and Data Warehouses
ACADEMIC RESEARCH EXPERIENCE	Georgia Institute of TechnologyAtlanta, USA Graduate Research AssistantAug 2024 - Present • Conduct research on structured knowledge, retrieval-augmented language models, and evaluation methods for finance-oriented NLP systems. • Build research pipelines combining financial corpora, knowledge graphs, retrieval systems, prompting, and long-context LLM evaluation. Graduate AssistantAug 2023 - May 2024 • Developed retrieval-augmented generation pipelines for finance-oriented NLP applications, including document processing, embedding-based retrieval, prompt construction, and answer generation. • Implemented components for document chunking, vector search, retrieval evaluation, and LLM-based response generation. International Laboratory for Intelligent System and Structural AnalysisMoscow, Russia Research InternJun 2022 - Jul 2023 • Designed and built a database for educational materials of an Intelligent Tutoring System. • Extracted relevant material elements and created links with domain ontology. • Implemented a web application for managing databases with indexing ontology-linked materials. • Integrated the developed module with other ITS modules together with domain experts.
AWARDS AND HONORS	Oral PresentationJul 2026 KG-MuLQA was selected for oral presentation at ACL 2026.
PUBLICATIONS	Conferences KG-MuLQA: A Framework for KG-based Multi-Level QA Extraction and Long-Context LLM Evaluation. Nikita Tatarinov, Vidhyakshaya Kannan, Haricharana Srinivasa, Arnav Raj, Harpreet Singh Anand, Varun Singh, Aditya Luthra, Ravij Lade, Agam Shah, and Sudheer Chava. Association for Computational Linguistics (ACL) 2026.

Workshops

Language Modeling for the Future of Finance: A Survey into Metrics, Tasks, and Data Opportunities.

*Nikita Tatarinov**, Siddhant Sukhani*, Agam Shah, and Sudheer Chava.
Generation, Evaluation & Metrics Workshop at ACL (GEM@ACL) 2026.

INVITED TALKS

Multi-Agent AI Systems.

AI and Future of Finance Conference (2025), Georgia Institute of Technology.

TEACHING

Georgia Institute of Technology

Atlanta, USA

Head Graduate Teaching Assistant – GenAI in Finance

Jan 2026 - May 2026

- Developed and taught original lectures on text encoding, tokenization, embeddings, attention mechanisms, Transformer LLMs, autoregressive generation, decoding, KV caching, positional encodings, and retrieval-augmented generation.
- Created and taught hands-on Python materials implementing self-attention, scaled dot-product attention, causal masking, dropout, and multi-head attention in PyTorch.
- Designed assessment materials, including a quiz and a full RAG assignment focused on building and evaluating retrieval-augmented generation pipelines for finance-oriented NLP tasks.

Graduate Teaching Assistant – ML in Finance

Aug 2025 - Dec 2025

- Developed and taught original lectures covering mathematical foundations, information theory, feature engineering, supervised learning, and ensemble methods.
- Created and taught hands-on Python materials for PCA/factor modeling, regularization, cross-validation, logistic regression, random forests, and gradient boosting.

Graduate Teaching Assistant – AI in Finance

Aug 2024 - Dec 2024

- Graded and provided feedback on assignments covering applied machine learning, NLP, and generative AI methods for finance.
- Developed a full assignment on retrieval-augmented generation, guiding students through document processing, embedding-based retrieval, generation, and evaluation.
- Taught a lecture on RAG, covering retrieval pipelines, vector search, context construction, and evaluation challenges in finance-oriented GenAI systems.

Workshop Lead – Scheller College of Business

- Developed and taught hands-on workshops on Linux, Git, Python, and research-computing workflows for students working on AI/finance projects.
- Created beginner-friendly materials to help students transition from basic programming to reproducible ML experimentation.

NRU HSE

Moscow, Russia

Teaching Assistant

- Assisted courses in Applied Data Analysis Problems, Quantitative Methods in Economics, Databases, and Mathematical Methods for Data Analysis.
- Supported students with programming, statistics, data analysis, and mathematical modeling assignments.
